

Fungicidal activity + anti-itching ingredients and antifungal ingredients

# ブテナロック<sup>®</sup> V<sub>α</sub> 爽快パウダー

## Butenalock<sup>®</sup> V<sub>α</sub> Soukai powder

Therapeutic drug for athlete's foot/ringworm that contains butenafine hydrochloride

### Product features/characteristics

Discreet powder formula suppresses the symptoms of festering athlete's foot with itching!!

Triple formula with micro-powder provides a lasting feeling of smoothness and dryness.

"Jet type" nozzle that allows pinpoint spraying on the affected area, for simple/clean application without a need to touch the affected area directly.

### ⚠️ [Precautions]

**⊗ Do not use:** [Failure to follow directions may result in worsening of current symptoms or cause side effects.]

1. Do not use:
  - if you have a history of allergic symptoms to this product or ingredients of this product.
2. Do not use this product on the following areas:
  - (1) Eyes and the surrounding area, face, mucous membranes (e.g., oral cavity, nasal cavity, and vagina), scrotum, and external genitalia.
  - (2) Eczema.
  - (3) Affected areas with severe infiltration, sores, cracks, or trauma.

### Ask a doctor:

1. Ask a doctor, pharmacist, or registered distributor before use,
  - (1) If you are being treated by a doctor.
  - (2) If you are pregnant or possibly pregnant.
  - (3) Infants.
  - (4) If you have a history of allergic symptoms due to drugs.
  - (5) If an affected area is extensive.
  - (6) If the affected area is purulent.
  - (7) If you are not sure whether the cause is "Eczema" or "Tinea pedis, tinea cruris, or tinea corporis"  
(It is often due to eczema or other causes when there are symptoms of itching/sore in the scrotum.)
2. If the following symptoms appear after use, they may be adverse reactions. Stop using this product immediately, and ask a doctor, pharmacist, or registered distributor with this information leaflet.

Related area	Symptoms
Skin	Rash/redness, itching, eruption, swelling, irritation, warmth, desquamation, sores, blisters, dryness, sting, cracks

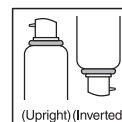

3. If the symptoms persist after 2 weeks of use, stop using the product and ask a doctor, pharmacist, or registered distributor with this information leaflet.

It contains alcohol and may sting the skin during application.

## Precautions for storage and handling

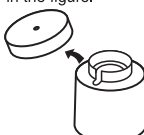

- (1) Store in a cool place with cap closed tightly, away from direct sunlight.
- (2) Keep out of reach of children.
- (3) Avoid storing the product in other containers (it may result in a misuse or a change in quality).
- (4) Do not use the product after the expiration date. Also, use as soon as possible after opening the package even if the expiration date has not passed for ensuring the quality.
- (5) Keep away from fire and do not place the product in fire. Also, the container should not be thrown into fire after use.
- (6) This product may soften synthetic resins (styrol) or dissolve paint. Make sure that this product does not come into contact with bags, floors, or furnitures.
- (7) Do not use this product in places with fire sparks.

<Packaging> 70mL

## [Precautions and method for the use of degassing cap/method of separate disposal]

\*The figure below is an information leaflet of the product. Sample product has a different structure.

(1) Remove the upper part of the cap and place it on the flat surface as shown in the figure.

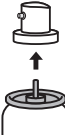

(2) Turn the main body upside down and place it until the nozzle fits the receptacle of the cap.

(3) Push the main body in until it clicks and leave it until the hissing sound is no longer heard.

(4) Pull out the "Push button" after the hissing sound is no longer heard.

(5) Dispose separately according to local government guidelines.

\* After the content is used up completely, degas the container outdoor, away from fire.

\* During degassing, turn your face away from the nozzle because the remaining medicine solution comes out together with the gas.

\* Do not use those other than the cap of this product for degassing.

## 5 tips for the treatment of athlete's foot

**1** Always ensure that your feet are not sweating.

Trichophyton multiplies when the temperature is 15°C and above, with humidity of 70% or more. Always prevent sweating and try to keep your feet dry.

**4** Continue to apply the medicine to the athlete's foot for at least 1 month even after symptoms disappear.

Even if symptoms disappear, it may be that only the activity of Trichophyton is suppressed, not the disease. Be patient, for continuous application is essential for the cure.

More than 1 month

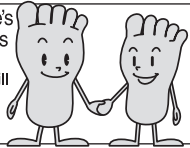

**2** Keep the affected area clean. It is important to wash the affected area with soap everyday.

Although this product is effective if used once daily, it is important to take appropriate long-term measures such as avoiding sweating and keeping the shoes and socks clean (frequent washing).

**5** If one of the family members has athlete's foot, it is recommended that all members of the family should also be treated.

If one of the family members has athlete's foot, it will pass on to the others. Take a treatment as soon as possible if you notice a symptom.

**3** Apply the drug thinly, not only to the affected area but also to the surrounding area.

Apply the drug extensively because the area of infection of Trichophyton is often wider than the area with symptoms.

Daily comprehensive foot care is important for the cure of athlete's foot.
