

# ブテナロック<sup>®</sup>L パウダーゲル

## Butenalock<sup>®</sup>L Powder gel

Medicine for athlete's foot/ringworm

### Product features/characteristics

- Athlete's foot/ringworm are diseases induced by infestation of mold (fungus) called Trichophyton in the corneal layer of the skin surface. Trichophyton invades the keratins in the corneal layer of the skin surface, inducing severe itching.
- Butenalock L Powder Gel is a therapeutic drug for athlete's foot/ringworm with excellent fungicidal effect on the pathogenic fungi in athlete's foot (Trichophyton).

- Penetrates well into the corneal layer and kills the pathogenic fungi in athlete's foot (Trichophyton).
- Due to excellent skin retention, this product works by once daily usage.
- Medicine for athlete's foot/ringworm that contains 1% butenafine hydrochloride

### Example indications of Butenalock L [Powder gel] (Also applicable to other symptoms.)

### ⚠[Precautions]

**❌ Do not use:** [Failure to follow directions may result in worsening of current symptoms or cause side effects.]

1. Do not use:  
if you have a history of allergic symptoms to this product or ingredients of this product.
2. Do not use this product on the following areas:
  - (1) Eyes and the surrounding area, mucous membranes (e.g., oral cavity, nasal cavity, and vagina), scrotum, and external genitalia.
  - (2) Eczema.
  - (3) Affected areas with severe infiltration, sores, cracks, or trauma.

### Ask a doctor:

1. Ask a doctor, pharmacist, or registered distributor before use,
  - (1) If you are being treated by a doctor.
  - (2) If you are pregnant or possibly pregnant.
  - (3) Infants.
  - (4) If you have a history of allergic symptoms due to drugs.
  - (5) If the affected area is on the face or extensive.
  - (6) If the affected area is purulent.
  - (7) If you are not sure whether the lesion is "Eczema" or "Tinea pedis, tinea cruris, or tinea corporis".  
(It is often due to eczema or other causes when there are symptoms of itching/sore in the scrotum.)
2. If the following symptoms appear after use, there may be side effects. Stop using this product immediately, and ask a doctor, pharmacist, or registered distributor with this information leaflet.

Related area	Symptoms

- (1) Store in a cool place with lid closed tightly, away from direct sunlight.
- (2) Keep out of reach of children.
- (3) Avoid storing the product in other containers (it may result in a misuse or a change in quality).
- (4) Do not use the product after the expiration date. Also, use as soon as possible after opening the package even if the expiration date has not passed for ensuring the quality.
- (5) Keep away from fire and do not place the product in fire. Also, the container should not be thrown into fire after use.

<Packaging> 15g

**5 tips for the treatment of athlete's foot**

<p><b>1</b> Always ensure that your feet are not sweating.</p> <p>Trichophyton multiplies when the temperature is 15°C and above, with humidity of 70% or more. Always prevent sweating and try to keep your feet dry.</p> 	<p><b>4</b> Continue to apply the medicine to the athlete's foot for at least 1 month even after symptoms disappear.</p> <p>Even if symptoms disappear, it may be that only the activity of Trichophyton is suppressed, not the disease. Be patient, for continuous application is essential for the cure.</p> 
<p><b>2</b> Keep the affected area clean. It is important to wash the affected area with soap everyday.</p> <p>Although this product is effective if used once daily, it is important to take appropriate long-term measures such as avoiding sweating and keeping the shoes and socks clean (frequent washing).</p> 	<p><b>5</b> If one of the family members has athlete's foot, it is recommended that all members of the family should also be treated.</p> <p>If one of the family members has athlete's foot, it will pass on to the others. Take a treatment as soon as possible if you notice a symptom.</p> 
<p><b>3</b> Apply the drug thinly, not only to the affected area but also to the surrounding area.</p> <p>Apply the drug extensively because the area of infection of Trichophyton is often wider than the area with symptoms.</p> 	<p>Daily comprehensive foot care is important for the cure of athlete's foot.</p>
